INDIAN Motocycle 81 Drop Forgings in the 1916 Indian

DROP forgings alone—costly to make as they are—meet Indian ideals of strength and stamina where durability and strength are most needed. They are used because they are tougher than castings and more dependable than stampings.

Indian is called the all-drop-forge machine because it has more drop forgings than any other motorcycle made.

81 of these Samson pieces in the Indian make a machine which withstands, with smallest wear and operating cost, the hardest tests to which a motorcycle can be subjected.

Automobile engineers, who have studied the Indian and Indian manufacturing methods, marvel at the expensiveness and fineness of Indian construction, for it is built like a high grade motor car.
